

# DMN798

## Breakable Seal for Manual Call Points

### General

---

The DMN798 is an anti-tamper, breakable seal for manual call points. It allows the manual call point cover to be "locked" to the manual call point, forcing a 3-stage operation and eliminating accidental or tamper alarms. The DMN798 can be easily broken without the need for special tools.

### Standard Features

---

- Provides tamper protection for manual call points
- Forces 3-stage operation for any manual call point activation
- Easily breakable without tools
